

VEDIKA SAPKAL

Pune, Maharashtra, India | +91-9699405725 | vedikasapkal196@gmail.com
linkedin.com/in/vedika-sapkal | github.com/vedika-sapkal

SUMMARY

Analytical software professional with hands-on enterprise engineering experience building highly scalable architectures, responsive frontend layouts, and relational database systems. Proficient in optimizing data pipeline rendering cycles and containerizing complex web applications to eliminate operational bottlenecks.

SKILLS

Languages: Core Java, JavaScript, TypeScript, C#, HTML5, CSS3
Frameworks: React.js, Angular, Node.js, Express.js, ASP.NET Core MVC, Java Swing
Databases & Cloud: SQL, MySQL, MS SQL Server, JDBC, RESTful Web APIs, AWS, Azure, Docker, CI/CD, Git

EXPERIENCE HIGHLIGHTS

Software Development Intern – Nexoraa Technosolve IT Services Pvt. Ltd. Dec 2025 – May 2026 | Pune, India

- Architected a secure Loan Management System using React, Angular, and SQL processing 5,000+ applications with 100% data integrity.
- Engineered administrative control dashboards with real-time data streaming, reducing rendering metric latency by 35%.
- Implemented advanced Role-Based Access Control (RBAC), decreasing authentication overhead by 20%.
- Optimized relational database efficiency by 40% through strict indexing strategies and query tuning execution plans.

Full Stack Developer Intern – Montcrest Software June 2025 – Nov 2025 | Pune, India

- Engineered core modules for a corporate Learning Management System (LMS) scaling system capacity to support 2,500+ concurrent active student profiles.
- Utilized React Hooks and Redux state management architecture, decreasing asynchronous page-render bottlenecks by 30%.
- Containerized multi-tier applications using Docker and automated CI/CD deployment pipelines inside Azure DevOps and GitHub Actions.

KEY PROJECTS & PUBLICATIONS

Hospital Management System (Full Stack Architecture) – Project

- Designed a secure medical records portal using Node.js, Express.js, and MySQL, achieving a 15% efficiency increase in automated bookings.

Battery SoC Prediction Control (IEEE Publication) – Publication

- Published a peer-reviewed research paper establishing a machine learning-driven framework for forecasting battery state-of-charge, attaining a 94.2% predictive accuracy rate using linear regression algorithms.

EDUCATION

JSPM University Pune – B. Tech in Information Technology 2023 – 2026 | Pune, India
Current Cumulative SGPA: 8.45

Government Polytechnic Ratnagiri – Diploma in Electronics & Telecommunication 2021 – 2023 | Ratnagiri, India
Final Aggregate: 72.00%

TOP CERTIFICATIONS

- Java Full Stack Developer Master Certification (Eduskills)
- Cyber Security & Data Privacy Engineering (NPTEL)
- Data Science Industry Specialization (Eduskills)
- Python Programming Professional Designation (Aptech)
